## VENTURES

We Recycle Paper and Plastic Scrap  
Rethink. Reuse. Recycle.

“ Plastic doesn’t have to be a problem – when recycled with purpose, it becomes part of the solution for a sustainable world. ”

## About Us

At **Source One Ventures**, every bale, roll, lump and regrind in this catalogue is more than just material – it’s a promise to rethink, reuse and recycle with purpose. From our roots in Canada, we have grown into a global plastic-recycling partner, connecting responsible generators of post-industrial plastic scrap with recyclers, processors and converters across India and the wider South-East Asian market.

Working across **Canada, the USA, Australia, New Zealand and Europe**, we source directly from manufacturers, printers, converters and recovery facilities, consolidating diverse plastic grades into a single, reliable stream – one source for all your plastic recycling needs. Backed by rigorous quality checks and transparent documentation, we help our partners secure consistent, contamination-controlled supply while diverting valuable plastics from landfills into high-value production.

Every year, Source One Ventures helps recycle **over 50,000 MT of post-industrial plastic scrap, spanning more than 30+ grades** – from LDPE lumps, purge and bales to HDPE pipe shavings, rigid plastics, laminated rolls, BOPP rolls, PE/PA films and more.

This catalogue is your guide to that portfolio: a snapshot of the materials that keep your machines running, your costs controlled, and your products competitive, while supporting a truly circular plastics economy.

Whether you are a recycler in India looking for long-term, stable plastic scrap supply, or a supplier in North America, Europe or Oceania seeking a trusted export partner, **Source One Ventures stands in the middle** – closing loops, building relationships, and turning yesterday’s plastic waste into tomorrow’s raw material.

---

Dealing in Bales, Regrinds, Lumps & Resins.

**50,000 MT**

Recycling annually, across the globe.

Rethink.  
Reuse.  
Recycle.
